## ABSTRACT

The main body of this directory lists for each district, in alphabetical order by county and State, the following information: name of unit; pupils; teachers; tax returns by high, middle, and low income; adjusted gross incomes per pupil and per teacher; and total income tax per pupil and per teacher. Summary totals by county and State are also included. Funds for this research were provided by an ESEA Title V grant. Related documents are EA 003 537, EA 003 538, and ED 036 007. (Author/RA)

## FOREWORD

The National Educational Finance Project has made the first analysis of per local public elementary and secondary school districts in the United States. This has made this possible. Since a Zip Code was included as a part of every taxpayer presented a unique opportunity to produce small area data from individual income. Zip Code provided a common element between income and school data. Using the Zip Code Internal Revenue Service Master File of Zip Code Area Data which was based on the Master File of Income Tax Returns for 1966 filed during calendar year 1967 was the States Office of Education Master File of the Universe of Public and Nonpublic Day Schools 1968-69.

Appreciation is expressed to the Internal Revenue Service and the United States Education for their cooperation in providing the basic data for this directory. acknowledgment is extended to the University of Tennessee Computing center which necessary computing facilities to complete the directory. Thanks are also due Dr. K. Forbis Jordan, and Mr. Wendell Van Auken, all of the National Educational Dr. John Ray, Associate Professor, and Mr. David Taylor, Systems Analyst, both Tennessee, for their special assistance and cooperation in helping to prepare the

## FOREWORD

National Finance Project has made the first analysis of personal income data by primary and secondary school districts in the United States. The advent of Zip Codes has provided a means of identifying school districts. Since a Zip Code was included as a part of every taxpayer's return record, it provided an opportunity to produce small area data from individual income tax returns. Thus, the common element between income and school data. Using the Zip Code as a key, the Income Tax Master File of Zip Code Area Data which was based on the complete Individual Income Tax Returns for 1966 filed during calendar year 1967 was merged with the United States Census Master File of the Universe of Public and Nonpublic Elementary and Secondary Schools. This data was expressed to the Internal Revenue Service and the United States Office of Education in providing the basic data for this directory. A special grant was provided to the University of Tennessee Computing center which made available the facilities to complete the directory. Thanks are also due Dr. Kern Alexander, and Mr. Wendell Van Auken, all of the National Educational Finance Project, and the Professor, and Mr. David Taylor, Systems Analyst, both of the University of Tennessee for special assistance and cooperation in helping to prepare this directory.

R. L. Johns

## INTRODUCTION

This directory provides an analysis of personal income data by local public school districts in the United States. The main body of the directory lists, in county and state, for each district the following information:

- Name of unit
- Pupils
- Teachers
- Tax returns under 3,000
- Tax returns between 3,000 and 10,000
- Tax returns over 10,000
- Adjusted gross income per pupil
- Adjusted gross income per teacher
- Total income tax per pupil
- Total income tax per teacher

Also included are:

- a. Summary totals by county
- b. Summary totals by state

The data presented in this directory were subject to any inconsistencies in the Service Individual Master File tape and in the United States Office of Education. A complete explanation of the terms and abbreviations, sources and limitations, reports, instrumentation, and other available data see the Appendixes.

The following footnotes apply to this directory:

\*Incomplete educational data

#School district miscoded - should be merged

## A P P E N D I X A

### EXPLANATION OF TERMS AND ABBREVIATIONS

To insure a more complete understanding of the present report an explanation of the terms and abbreviations used in the Internal Revenue Service Master File of Zip Code Area Data and in the United States Office of Education Master File of the Universe of Public and Nonpublic Elementary and Secondary Day Schools is presented.

#### Definition of Terms

##### Adjusted Gross Income

For many taxpayers whose only source of income was salaries and wages, adjusted gross income was their total income. For others, this amount was the result of reducing total income from all sources subject to tax by deductions such as the following:

- (1) Ordinary and necessary expenses of operating a trade or business,
- (2) Employee business and moving expenses,
- (3) Expense deductions attributable to rents and royalties,
- (4) Expenses for education required to maintain salary, status, or present employment,
- (5) Depreciation and depletion allowed life tenants and income beneficiaries of property held in trust,
- (6) Deductible losses from sales of capital assets and other property,
- (7) Deduction equal to 50 percent of the excess of net long term capital gain over net short term capital loss,
- (8) Net operating loss deduction,
- (9) Contributions to a retirement fund by the self-employed,

Wherever this computation resulted in a negative amount, income for that return was recorded as "0".

##### Elementary and Secondary

Respondents were instructed to report pupils and teachers by educational level. The classification of schools as elementary or secondary was based on definitions in Handbook I, The Common Core of State Educational Information. Thus, an organizational arrangement consisting of grades 1 through 12 is divided into grades 1 through 6 and 7 through 12, 1 through 8 and 9 through 12, or some other pattern, depending upon the particular school district organization; i.e., whether 7th and 8th graders are taught as elementary-level students or as secondary-level students.

Grades beyond grade 8 were generally considered secondary. In some instances, however, such as in Amish or Mennonite communities, where it is customary for children to be kept in elementary school organizations through compulsory school age, schools reporting grades 1 through 9 or 1 through 10 were shown as elementary, if so classified by the respondents.

Secondary school encompassed high and intermediate schools as well as those that offer academic work at a level below college-level work. "Middle school" was defined as elementary or secondary, as designated.

The following types of public schools were included in the NEFP directory:

- a. Nonoperating school systems. These systems are defined as those that may levy taxes or conduct operations but are not themselves operating.
- b. Intermediate school districts. These units are those serving local school systems and county intermediate units in the western, and Western States, England, and the supervisory units.
- c. Separate junior college districts.
- d. State-operated schools.
- e. Federally operated schools.
- f. Elementary and secondary universities.

##### Number of Exemptions

In the tax computation, a \$600 exemption was allowed for each exemption claimed by each taxpayer shown on a return (regardless of whether the taxpayer was regarded as a taxpayer) and for each exemption allowed for taxpayers 65 or over, or blind.

The total number of exemptions claimed for certain individuals. These include:

- (1) dependents who had less than \$600 of income and for whom a return to obtain a refund of tax was required.
- (2) dependents under 19 years of age who were required to file a return because their gross income was more than \$600.

These individuals were counted as exemptions on their own returns and as dependents on another's return.

##### Number of Returns

Number of returns included in the NEFP directory by individual income taxpayers (1960-1969).

## EXPLANATION OF TERMS AND ABBREVIATIONS

ing of the present report an  
used in the Internal Revenue  
and in the United States Office  
of Public and Nonpublic  
resented.

Secondary school encompassed all high schools, including junior  
high and intermediate schools as well as vocational and grade schools,  
if they offer academic work at a level beyond the elementary school  
and below college-level work. "Middle" schools were classified either  
elementary or secondary, as designated by the respondents.

rms

The following types of public school administrative units were not  
included in the NEFP directory:

of income was salaries and wages,  
ome. For others, this amount was  
all sources subject to tax by

- a. Nonoperating school systems.  
These systems are defined as those which exist as legal entities  
and may levy taxes or contract for school services but which  
were not themselves operating schools in Fall 1968.
- b. Intermediate school districts.  
These units are those serving as intermediates between the  
Local school system and the State education agency, e.g., the  
county intermediate units prevalent in the Midwestern, South-  
western, and Western States, the supervisory unions in New  
England, and the supervisory districts of New York State.
- c. Separate junior college districts.
- d. State-operated schools.
- e. Federally operated schools
- f. Elementary and secondary schools operated by colleges and  
universities.

s of operating a trade or business,  
xpenses,  
e to rents and royalties,  
d to maintain salary, status, or

owed life tenants and income

of capital assets and other property,  
of the excess of net long term  
loss,

fund by the self-employed,

in a negative amount, income for

Number of Exemptions

In the tax computation, a \$600 deduction from adjusted gross income  
was allowed for each exemption claimed. An exemption was allowed for  
each taxpayer shown on a return (on joint returns husband and wife were  
regarded as a taxpayer) and for each qualified dependent. Additional  
exemptions were allowed for taxpayers (but not dependents) who were age  
65 or over, or blind.

The total number of exemptions included a duplication of exemptions  
for certain individuals. These individuals were--

- (1) dependents who had less than \$600 gross income, but filed a  
return to obtain a refund of tax withheld on wages, and
- (2) dependents under 19 years of age or students who were required  
to file a return because their gross incomes were \$600 or more.

These individuals were counted twice, as taxpayers filing their own  
returns and as dependents on another taxpayer's return.

Number of Returns

Number of returns included tax returns (Forms 1040 and 1040A) filed  
by individual income taxpayers (regardless of marital status) during

port pupils and teachers by educational  
elementary or secondary was based  
Core of State Educational Information.  
isting of grades 1 through 12 is divided  
2, 1 through 8 and 9 through 12, or  
particular school district organi-  
s are taught as elementary-level

ly considered secondary. In some  
Mennonite communities, where it is  
ementary school organizations through  
g grades 1 through 9 or 1 through 10  
ied by the respondents.

calendar year 1967. Most of these returns were for tax year 1966 and were filed by taxpayers with calendar year accounting periods. A small number of prior year delinquent and noncalendar year returns was also included. In the few instances where the same taxpayer might have filed multiple returns during 1967, however, he was only counted once.

Total returns included returns of single taxpayers, of married persons filing separately, of surviving spouses, of unmarried heads of household, as well as joint returns of married couples.

#### Teacher

A teacher was defined as "a staff member performing assigned professional activities in guiding and directing the learning experiences of pupils in an institutional situation." Numbers of teachers were reported in full-time equivalents, meaning that they represented the number of full-time teaching positions, rather than the number of separate individuals employed full time or part time in teaching functions. For example, a principal or librarian who taught half days was counted as 0.5 of a teacher, and an individual who came into the school to teach music 2 half days per week, as 0.2 of a teacher. Teacher aides and assistants were not included.

#### Total Income Tax

Total income tax was the sum of income tax after credits, self-employment tax due under the Social Security law, and any additional tax liability due to recomputing prior year investment credit.

As the name "income tax after credits" implies, this amount was net of the retirement income credit, the investment credit, the foreign tax credit, and other statutory credits. However, tax withheld and estimated tax payments made during the year were not considered in computing total tax, since they represented prepayments of that tax.

#### Zip Code Areas

The Zip Code is a five-digit code developed by the Post Office Department to facilitate the distribution of mail. The first digit of each Zip Code identifies one of ten National service areas, each consisting of from three to seven States. The second digit identifies a State, a portion of a large State, or two small States. The third digit identifies a portion of a State, known as a sectional center or zoned city, while the fourth and fifth digits pinpoint an individual post office facility and the area it serves.

## APPENDIX B

### SOURCES AND LIMITATIONS OF DATA

To insure a more complete understanding of the present directory an explanation is given as to sources and limitations of the data.

#### Source of Data

##### NEFP Directory

The data in this directory consisted of a merging of the IRS Master File of Zip Code Area Data which was based on the complete Individual Master File of Income Tax Returns for 1966 filed during calendar year 1967 and the USOE Master File of the Universe of Public and Nonpublic Elementary and Secondary Day Schools 1968-1969. Nonpublic school students were not incorporated into this directory due to inadequate data in the USOE file.

##### IRS Master File

The IRS Master File of Zip Code Area Data was extracted from the IRS Individual Master File (IMF), which contains records of all tax transactions of individual income taxpayers. All 1966 returns filed were used for the tabulations.

A 1966 return was defined as a Form 1040 or 1040A posted to the IMF during calendar year 1967. Most of these returns did, in fact, cover income received during calendar year 1966. A small number of prior year delinquent and noncalendar year returns were included as well.

Returns filed from abroad with the Office of International Operations were excluded from the tabulations. Returns of military personnel stationed abroad using APO (Army Post Office) and FPO (Fleet Post Office) addresses were included in the appropriate APO and FPO Zip Codes. (Note: Neither the APO nor the FPO returns were included in the NEFP merged file).

A relatively small number of taxpayers filed more than one return during calendar year 1967 (i.e., one regular return plus a prior year delinquent return). In those instances the combined total amounts of income and tax reported during the year were shown in the tabulations. However, the taxpayer was counted only once (i.e., as one return), and exemptions shown corresponded to those reported on the latest return filed. Any distorting effect this procedure may have had on average income was probably counterbalanced by the existence of returns with no information on income or tax in the return count.

An individual income tax return was required of (1) every citizen or resident alien under 65 years of age (including minors) who had \$600 or more of gross income for the year, (2) every citizen or resident 65 years or over who had \$1,200 or more gross income for the year, and (3) every person regardless of age or gross income who had self-employment income of \$400 or more during the tax year. Gross income, for purposes of filing, included income earned from sources outside the United States, even if the income was exempt from tax.

Individuals who had tax withheld less than that required for filing tax withheld, so that in all, about 10 million by the tax system in 1966, as compared to 197 million by the Bureau of the Census.

Taxpayers had a choice of tax returns for 1966. Form 1040A, the simplified return, was for individuals who had less than \$10,000 of wages reported on withholding statements, and no dividends, interest, or capital gains. Form 1040 was a two-page return for reporting other sources of income. See Appendix D.

The primary source of the address given by each taxpayer was the file of all commonly accepted codes, whenever possible, to establish a code for the address indicated. The groups of districts, are identified by File District Code was used as a report.

##### USOE Master File

Detailed information on each school was obtained from a brief questionnaire, OE Form 230, Appendix D. These forms were mailed to the State Education beginning October 1, 1967, requested data on computers or with a punched card format with the data used for processing within the State.

School-by-school data were chosen by the State education department from the National Center for Education as follows: in three states, 10 school districts; in one, 10 school superintendents; 14 State school districts, which responded to Education; 15 States and all of the District of Columbia.

<sup>1</sup>The IRS figure was obtained by the number of taxpayers each for the number of dependents' exemption. Both figures include armed forces. It should be noted, is for July 1967 persons who were alive at any time during the year.

## SOURCES AND LIMITATIONS OF DATA

Understanding of the present directory and its sources and limitations of the data.

## Source of Data

Consisted of a merging of the IRS Master file as based on the complete Individual Master file filed during calendar year 1967 and the Public and Nonpublic Elementary and Nonpublic school students were not due to inadequate data in the USOE file.

Code Area Data was extracted from the IRS file which contains records of all tax transactions. All 1966 returns filed were used for the

as a Form 1040 or 1040A posted to the IMF. If these returns did, in fact, cover income tax. A small number of prior year delinquent returns were included as well.

with the Office of International Operations. Returns of military personnel stationed overseas and FPO (Fleet Post Office) addresses were included. APO and FPO Zip Codes. (Note: Neither the APO and FPO Zip Codes were included in the NEFP merged file).

If taxpayers filed more than one return during the calendar year, the regular return plus a prior year delinquent return, the combined total amounts of income and tax were used in the tabulations. However, the exemptions shown in the latest return filed. Any distorting effect on average income was probably counteracted by the inclusion of returns with no information on income or tax.

Return was required of (1) every citizen or resident (including minors) who had \$600 or more of gross income for the year, and (2) every citizen or resident 65 years of age or older. Gross income, for purposes of filing, includes income from sources outside the United States, even if the

Individuals who had tax withheld from wages, but whose income was less than that required for filing, usually filed to obtain a refund of tax withheld, so that in all, about 183 million individuals were covered by the tax system in 1966, as compared to a total population estimated at 197 million by the Bureau of the Census.<sup>1</sup>

Taxpayers had a choice of two return forms for reporting their income for 1966. Form 1040A, the card-form, was available to individuals who had less than \$10,000 adjusted gross income consisting of wages reported on withholding statements (Form W-2) and not more than \$200 of dividends, interest, and wages not subject to income tax withholding. Form 1040 was a two-page form which had supplementary schedules for reporting other sources of income. Both Forms are reproduced in Appendix D.

The primary source of the geographic classifications was the return address given by each taxpayer. The Internal Revenue Service library file of all commonly accepted city-State name combinations was used whenever possible, to establish the correct Zip Code and IRS district code for the address indicated. Since Internal Revenue districts, or groups of districts, are identical with State Boundaries, the Master File District Code was used as the basis of state classifications in this report.

USOE Master File

Detailed information on each school was collected by means of a brief questionnaire, OE Form 2304, a copy of which is included in the Appendix D. These forms were mailed by the United States Office of Education beginning October 1, 1968. States that had all or most of the requested data on computers or in other electronic form were provided with a punched card format with instructions comparable to those being used for processing within the United States Office of Education.

School-by-school data were obtained through various procedures chosen by the State education agency from options set forth in an inquiry from the National Center for Educational Statistics. The choices were as follows: in three states, questionnaires were mailed directly to the school districts; in one, responses were obtained through the county school superintendents; 14 States mailed the forms to their schools or school districts, which responded directly to the United States Office of Education; 15 States and all outlying areas filled out the standard report

<sup>1</sup>The IRS figure was obtained by counting two taxpayers for each point return, one taxpayer each for all other types of returns, and adding the number of dependents' exemptions (total number of exemptions, about 10 million higher, includes additional exemptions for age and blindness). Both figures include armed forces stationed abroad. The Census estimate, it should be noted, is for July 1, 1966, while IRS exemptions include persons who were alive at any time during the taxable year.

forms for their schools from records and other sources in their offices; and 17 States sent their responses on punched cards tailored to the prescribed format. Responses from schools operated by the Department of Defense and the Bureau of Indian Affairs were reported on the form by a request routed through those agencies and coordinated by them.

Included in the survey were all schools operating at the elementary or secondary level and offering regular school subjects in the fall of the 1968-69 school year. These consisted of all nonpublic and public schools, including public schools operated by State, county, and Federal agencies as well as those included in Local public school systems. (Note: only the schools in the Local public elementary and secondary school system were included in the NEFP directory).

Excluded were separately organized kindergartens and prekindergartens; but the preprimary parts of elementary schools were included, and their pupils and teachers, where separately available, were included. Also excluded were night schools, tutoring schools and clinics, custodial institutions without general education programs, nonacademic vocational or technical schools, and junior colleges.

#### Limitations of Data

##### NEFP Directory

The data presented in this directory were subject to any inconsistencies in the original. Internal Revenue Service Individual Master File tape and in the United States Office of Education Master File tape.

There were a relative small number of schools for which a corresponding Zip Code record match from the IRS Master File tape could not be made. These schools were eliminated.

When two or more schools were within the same Zip Code area, the IRS data for the Zip Code area were prorated in accordance to the pupil enrollment of the schools within that Zip Code area.

When two or more schools from the same school system were overlapping into two counties, the school system was placed in that county where the greatest proportion of the pupils attended schools.

##### IRS Master File

The accuracy of the data was affected by taxpayer reporting errors as well as a systemic errors introduced in processing the data. However, efforts were made throughout the system to minimize such errors.

After a return record was first keypunched and entered onto a "transaction tape," but before it was posted to the Individual Master File, it was subjected to validity and mathematical verification tests. The validity tests

were a series of examples, if an amount if tax withholding exemptions claimed the return record. If it could not be initiated. Once entered on the IM

affected by taxpayer reporting errors as well as processing the data. However, efforts were made to correct such errors.

keypunched and entered onto a "transmission" tape to the Individual Master File, it was subject to the validity verification tests. The validity tests

were a series of checks on the consistency of the return records. As examples, if an amount was shown for refund, but none for withholding; if tax withholding was greater than total wages; or if the number of exemptions claimed was inconsistent with the marital status shown; then the return record was considered invalid and was read out for correction. If it could not be corrected, correspondence with the taxpayer was initiated. Once the discrepancy was resolved, the corrected data were entered on the IMF.

Mathematical verification involved a recomputation of tax liability (balance due or refund requested) on the basis of the income, marital status, deduction, and exemption data given by the taxpayer. If the recomputed tax liability differed from that indicated on the return record, the return was read out for correction or to initiate correspondence with the taxpayer.

Any correction made by tax examiners during document perfection or as a result of the validity or mathematical verification tests was reflected in these tabulations.

There were two basic limitations of the geographic classifications. One involved the address reported by the taxpayer; the other the ability of the computer to recognize the address reported.

Taxpayers were supposed to indicate their home address on their returns. The vast majority did. However, some may have given their business address, the address of the assessor who prepared the return, a post office box in a town other than the one they lived in, or no address at all. Geographic classifications had to be based on whatever address was shown on a return. If no address was given, the return was coded for the State in whose district office it was filed.

Even if the taxpayer indicated his home address on his return, it might not have been machine-readable for one of the following reasons:

1. The taxpayer had indicated a City-State name combination not recognized by the Post Office Department or not commonly used by mailers, and therefore not recorded on the IRS library tape.
2. He had misspelled the city or used a spelling not generally accepted.
3. He had written the address illegibly.
4. The keypuncher had mispunched the address.

In these circumstances, as in the case where no return address was given, the return was coded for the State in which it was filed. The Zip Code used was that given by the taxpayer, as long as it was one valid for the State of filing. If it was invalid, the return was classified as "unallocated" by Zip Code.

#### USOE Master File

The data in this file represent the 93,562 elementary and secondary schools in the United States for which reports were received and found usable. This represents over 98 percent of the known public schools. Reports were not received from approximately 1780 schools. These schools are listed in the next section.

## APPENDIX C

### COMPARABILITY WITH RELATED REPORTS

To insure a more complete understanding of the present directory an explanation is given as to comparability with related reports.

#### NEFP Directory To Other Reports

Although there were some differences between pupil and teacher state totals as shown in the NEFP directory and those presented in the USOE directory,<sup>1</sup> the average difference was less than 1 percent for 44 out of the 50 states. The exceptions were as follows:

Maine (10%) and New Hampshire (11%): For these two states the total pupil and teacher figures were low because the USOE included summary data in their total figures for which individual school data were not presented on their master file.<sup>2</sup>

Alaska (9%), Arizona (6%), Wyoming (7%) and Texas (10%): For states in the Far West region the USOE figures included schools operated by the Bureau of Indian Affairs.<sup>3</sup> These schools were not included in the NEFP directory. This may account for the differences in the above states. In addition, for Texas the USOE reported their state totals from the Office of Education's Fall 1968 Survey of Public Schools because certain individual school data were missing from their master file.<sup>4</sup> The two school districts most affected were Fort Worth and Houston.

In regard to the personal income data there were some differences between state totals as shown in the NEFP directory and those presented in the IRS directory,<sup>5</sup> but the average difference was less than 1 percent for 43 out of the 50 states. The exceptions were as follows:

Maryland (21%): The Maryland discrepancy was in the Baltimore district and that was because a large number of U.S. servicemen living abroad and government officials file with the Baltimore District Office. To the extent that they indicated APO and FPO return addresses, they were classified as Maryland taxpayers in the IRS report. No APO and FPO returns were included in the NEFP directory. In addition, the District of Columbia was included as part of the Baltimore district in the Internal Revenue Service Master File. The District of Columbia was included as a separate district in the NEFP directory.

Alaska (6%), Connecticut (3%), Mississippi (8%) and Vermont: were due to IRS records that corresponding record match on master file.

#### Supplementary Statistics to Other Income Reports

In contrast to other reports this supplemental report is not based on individual Master File of Income. Unlike the other Statistics of Income reports, these returns were not subject to sampling variations.

Although there were some differences shown in this supplementary report and the Statistics of Income report for 1966, the States totals was less than 1 percent for adjusted gross income, and returns, adjusted gross income, and

In most cases, the difference was applicable to Master File revenue and regular Statistics of Income Program of adjusted gross income, taxpayer report differed somewhat from the Income program.

Even for items which were disclosed discrepancies may have arisen because of differences in the way returns were used for handling returns which a difference was particularly apparent in coding.

A joint return, both for the processing, was one filed by a husband reported their incomes (if both claimed those exemptions to which social security numbers of both of such a return, and both spouses to check a box indicating a joint

Problems arose, of course, under these conditions. The statistics of the sample of returns used in the joint if it most nearly matched

<sup>5</sup>Supplementary Statistics of Income 1966 Zip Code Area Data, Department of the Treasury, Internal Revenue Service.

## APPENDIX C

## COMPARABILITY WITH RELATED REPORTS

ing of the present directory and  
th related reports.

## Other Reports

between pupil and teacher state  
those presented in the USOE directory,<sup>1</sup>  
ent for 44 out of the 50 states. The

Alaska (6%), Connecticut (3%), Illinois (4%), Kentucky (5%),  
Mississippi (1%) and Vermont (3%): Some of these differences  
were due to IRS records that were eliminated because a  
corresponding record match could not be made with the USOE  
master file.

Supplementary Statistics of Income Report  
to Other Income Reports

For these two states the total  
because the USOE included summary  
individual school data were not

In contrast to other reports in the Statistics of Income series,  
this supplemental report is not based on a sample, but on the complete  
Individual Master File of Income Tax Returns for 1966. Therefore,  
unlike the other Statistics of Income reports, data in this report  
were not subject to sampling variability.

o) and Texas (10%): For states in  
included schools operated by the  
schools were not included in the NEFP  
differences in the above states.  
ted their state totals from the  
y of Public Schools because certain  
from their master file.<sup>4</sup> The two  
Fort Worth and Houston.

Although there were some differences between State totals as  
shown in this supplementary report and State totals in the regular  
Statistics of Income report for 1966, the difference in the United  
States totals was less than 1 percent with respect to number of  
returns, adjusted gross income, and total tax.

there were some differences  
directory and those presented in  
rence was less than 1 percent for 43  
as follows:

In most cases, the differences were due to the differing methods  
applicable to Master File revenue processing operations and to  
regular Statistics of Income Processing. In addition, the definitions  
of adjusted gross income, taxpayers' exemptions, and tax used in this  
report differed somewhat from those used in the regular Statistics of  
Income program.

pancy was in the Baltimore district  
of U.S. servicemen living abroad and  
Baltimore District Office. To the  
APO return addresses, they were  
the IRS report. No APO and FPO returns  
In addition, the District of  
e Baltimore district in the Internal  
District of Columbia was included as  
ectory.

Even for items which were defined the same way for both reports,  
discrepancies may have arisen because of differences in the procedures  
used for handling returns which were not internally consistent. This  
difference was particularly apparent in the case of marital status  
coding.

ary Day Schoos 1968-1969.  
es, U.S. Department of Health, Education

A joint return, both for the purposes of revenue and statistical  
processing, was one filed by a husband and a wife, on which both  
reported their incomes (if both had incomes), and on which both  
claimed those exemptions to which they were entitled. The names and  
social security numbers of both spouses were to be given at the top  
of such a return, and both spouses were to sign it. The taxpayer was  
to check a box indicating a joint return.

Problems arose, of course, where the taxpayer did not meet all  
of these conditions. The statistical editor (i.e., the one editing  
the sample of returns used in the annual report coded a return as  
joint if it most nearly matched the above criteria). The editors in

Zip Code Area Data, Department of the

revenue processing, on the other hand (i.e., those editing returns for the Master File, on which this report was based), did not recognize a return as joint unless the names of both taxpayers were given on the return--either at the top or in the signature area--even if other criteria for joint status were met. As a result of these procedural differences, almost 6 percent fewer returns are shown as joint in this supplemental report than in the annual Statistics of Income report for 1966.

All other items differ by 1 percent or less in the National totals, with differences not exceeding 2 percent in individual income classes.

#### Directory--Public Elementary and Secondary Day Schools 1968-1969 to Other Office of Education Directories

The data in this volume represent the 93,562 elementary and secondary schools in the United States for which reports were received prior to close-out and found usable. Aside from the fact that reports were not received from approximately 1780 schools, the figures were not entirely comparable with those published in the Office of Education's Fall 1968 Survey of Public Schools (OE-20007-68) because of differences in coverage and type of respondent. Whereas the annual fall Survey covers only those schools operated by local educational agencies, an attempt was made in the School Universe Survey (used for this directory) to obtain data for all types of public schools, whether operated by entities of local, county, State, or Federal Government. The respondents in the 1968 fall survey were the State educational agencies, which have had 15 years of experience in reporting, while the respondents in this first school universe effort was sometimes an administrative unit other than the SEA (local educational agency, school principal, etc.). The comparability of data for those schools covered in both surveys was affected to the extent that there were lack of familiarity with standard terminology and varying interpretations of reporting requirements at the various levels.

#### North Atlantic Region

A particular difficulty in comparing State-reported data with data received for individual schools exists in this region. In several of the New England States, there are public schools, nonpublic schools, and quasi-public academies which have both privately and publicly supported students. The latter were sometimes reported as public and sometimes considered as nonpublic, depending upon the particular year's financing. This fact may account for year-to-year variations in reports received from these States.

A further complication arises from the fact that the State education agency may report as public those students attending quasi-public academies at public expense, while still including the institutions and the remainder of the students in nonpublic school statistics. This procedure may account for the difference of 5,524 secondary school students in Vermont between the 1968 fall survey and the current study. The discrepancy in elementary teachers and enrollment in Maine and Rhode Island may be related in part to a similar difference between individual school and State-wide reporting.

#### Great Lakes and Plains Region

The response category differences in this region where teacher data seemed to represent a count of persons employed rather than full-time teachers only. In several time teachers had been reported as an apparent increase of teachers, but figures for teachers, possibly be attributed to the re-

#### Southeast Region

Response categories were full-time-equivalent teacher data seemed high for persons employed rather than full-time definition of teachers, the term was limited to "classroom teachers."

#### West and Southwest Region

The response category differences was that of data seemed high in this region persons employed rather than full-time definition of teachers, which the term was limited to "classroom teachers."

In this region part of those in the fall report were the Bureau of Indian Affairs.

i.e., those editing returns for the (based), did not recognize a return as if other criteria for joint status differences, almost 6 percent fewer supplemental report than in the annual

ent or less in the National totals, but in individual income classes.

#### Secondary Day Schools Education Directories

at the 93,562 elementary and secondary reports were received prior to close- fact that reports were not received figures were not entirely comparable Education's Fall 1968 Survey of Public differences in coverage and type of respondent. Only those schools operated by local made in the School Universe Survey (used all types of public schools, whether State, or Federal Government. The are the State educational agencies, in reporting, while the respondents was sometimes an administrative unit (agency, school principal, etc.). The is covered in both surveys was affected familiarity with standard terminology ng requirements at the various levels.

aring State-reported data with data s in this region. In several of the schools, nonpublic schools, and quasi- ately and publicly supported students. public and sometimes considered as ar year's financing. This fact may a reports received from these States.

from the fact that the State education ents attending quasi-public academies ing the institutions and the remainder statistics. This procedure may account school students in Vermont between the y. The discrepancy in elementary Rhode Island may be related in part to al school and State-wide reporting.

#### Great Lakes and Plains Region

The response category parti arly affected by reporting differences in this region was that of full-time-equivalent teachers. Where teacher data seemed high in this report, they may have repre- sented a count of perso employed rather than FTE's, and they may have been based on a broader definition of teachers than tha used in the fall survey, in which the term was limited to "classroom teacher" only. In several of the States of this region, no part- time teachers had been reported in the fall survey, resulting in an apparent increase of teachers reported in this survey. The lower figures for teachers, pupils, and graduates in one of the States may be attributed to the reporting of estimates in the fall survey.

#### Southeast Region

Response categories particularly affected by reporting differences were full-time-equivalent teachers and high school graduates. Where teacher data seemed high, they may have represented a count of persons employed rather than FTE's, and they may been based on a broader definition of teachers than that used in fall survey, in which the term was limited to "classroom teachers"

#### West and Southwest Region

The response category particularly affected by reporting differences was that of full-time-equivalent teachers. Where teacher data seemed high in is report, they may have represented a count of persons employed rather than FTE's, and they may have been based on a broader definition of teachers than that used in the fall survey in which the term was limited to "classroom teachers" only.

In this region particularly, figures for several States exceed those in the fall report due to the inclusion of schools operated by the Bureau of Indian Affairs.

## 1966 Tax Forms

In the following facsimiles of individual income tax returns, the items used in this report have been checked.

**1040 A U.S. Individual Income Tax Return** 1966

If item 7 is \$10,000 or more, or if interest, dividends, and nonwithheld wages are over \$200, use Form 1040.

1. Name (If a joint return of husband and wife, use first names and middle initials of both) \_\_\_\_\_  
Home address (Number and street or rural route) \_\_\_\_\_  
City, town or post office, State and ZIP code \_\_\_\_\_

2. Your social security number (Husband's if joint return) \_\_\_\_\_

3. Wife's number, if joint return \_\_\_\_\_

4. Check one:  
a. Single ☒  
b. Married filing joint return (even if only one had income) ☐  
c. Married filing separately (If your husband or wife is also filing a return give his or her name and social security number) ☐

5. Enter total wages, salaries, tips, etc. Enclose Forms W-2, Copy B. If not shown on enclosed Forms W-2 attach explanation. Yours \_\_\_\_\_ Wife's \_\_\_\_\_

6a. Interest \_\_\_\_\_ Yours \_\_\_\_\_ Wife's \_\_\_\_\_

6b. Dividends: Yours—before exclusion \$ \_\_\_\_\_ After \_\_\_\_\_  
(See inst.) Wife's—before exclusion \$ \_\_\_\_\_ After \_\_\_\_\_

7. Total Income (add items 5, 6a, and 6b) \_\_\_\_\_

8. Tax from Tax Table or tax computation schedule \_\_\_\_\_

9. Total Federal income tax withheld (from Forms W-2) \_\_\_\_\_

10. If item 8 is larger than item 9, enter B. Less: \_\_\_\_\_

11. If item 9 is larger than item 8, enter Refund \_\_\_\_\_

12. If your income was \$5,000 or more, you must compute your tax. If income was less than \$5,000, you may have the Internal Revenue Service compute your tax by omitting items 8, 10, and 11 (but, complete item 9). If you compute your own tax, pay balance (item 10) in full with return to your District Director.

Apply U.S. Savings Bonds, ☐ & excess refunded; or ☐ Refund only.

LIST YOUR EXEMPTIONS AND SIGN ON OTHER SIDE.

12. EXEMPTIONS FOR YOURSELF—AND WIFE (only if all her income is included in this return, or she had no income)  
Check boxes which apply: Yourself \_\_\_\_\_ Wife \_\_\_\_\_

13. First names of your dependent children who lived with you \_\_\_\_\_

14. DEPENDENTS OTHER THAN THOSE CLAIMED IN ITEM 13.

(a) NAME	(b) Relationship	(c) Months lived in your home, if not full year, give date beginning year also write "g." or "d."	(d) Did dependent have income of \$600 or more?	(e) Amount you furnished for dependent's support, if more than 100% write "ALL."	(f) Amount furnished by OTHERS including dependent's support, if more than 100% write "ALL."

15. TOTAL EXEMPTIONS FROM ITEMS 12, 13, AND 14 ABOVE \_\_\_\_\_

Your present employer \_\_\_\_\_  
Wife's present employer \_\_\_\_\_  
City and State where employed \_\_\_\_\_

## INSTRUCTIONS AND DEFINITION OF TERMS

**GENERAL.** This survey is intended to develop data on schools. "A SCHOOL" is a division of the school system consisting of a group of pupils composed of 1 or more grade groups, organized as one unit with 1 or more teachers to give instruction of a defined type, and housed in a school plant of 1 or more buildings. More than one school may be housed in one school plant or building, as is the case when the elementary and secondary programs are housed in the same school plant. "A TEACHER" is a staff member performing assigned professional activities in guiding and directing the learning experiences of pupils in an instructional situation. "2/ If a teacher is assigned only part time to this school, with the remainder of his time available to other schools or to other activities, the time assigned to teaching in this school should be prorated on the basis of a regular teaching work week and added in to the calculation of full-time equivalents. F.T.E. is expressed in decimals, to the nearest tenth.

**ITEM 1A.** Leave this space blank.

**ITEM 1B.** Enter school identification code used in your State, if any.

**ITEM 2.** If the school is located in a city which is not part of any county, enter here the name of the city.

**ITEM 3.** Use OFFICIAL name of district. The number requested here is NOT A CODE NUMBER assigned for data-processing identification, but is the numerical designation used in some States to properly identify the school district, such as River City No. 12, or Ashland R-4.

**ITEM 5.** Report here only work below college level

**ITEM 6.** A SPECIAL PROGRAM FOR THE HANDICAPPED refers to either physically or mentally handicapped pupils. A SPECIAL PROGRAM FOR THE EDUCATIONALLY DISAD-

**VANTAGED** is a program which has as its purposes (1) raising the educational achievement of certain educationally deprived children to levels appropriate for their ages, and (2) otherwise compensating for educational disabilities suffered through experience and environment. Funds come entirely or in part from State or Federal sources.

A VOCATIONAL EDUCATION PROGRAM is an instructional program designed to prepare enrollees for employment and administered in accordance with the "approved" State Plan for Vocational Education.

An ADULT EDUCATION PROGRAM is an organized program to provide opportunity for adults and out-of-school youth to further their skills, knowledge, habits, or attitudes.

**ITEMS 7, 8, and 9.** Pupils and teachers should be reported on the same organizational basis. The data should be as of a date when the school has achieved enrollment stability for the Fall term, usually on or about October 1. If a school plant has both elementary and secondary grades, it should be considered as 2 schools, and separate report forms should be filled in for each level.

**ITEM 10.** The number of graduates should include those for the regular school year plus any 1967 summer school graduates.

**ITEM 11.** Respondent data may be omitted in States where the information is being supplied by the State education agency.

## A P P E N D I X E

### OTHER AVAILABLE DATA

The National Educational Finance Project has the following additional education income data for the local public elementary and secondary school districts:

- Number of pupils and teachers--Kindergarten
- Number of pupils and teachers--Elementary
- Number of pupils and teachers--Secondary
- Total number of returns
- Total number of exemptions
- Total adjusted gross income
- Total income tax

In addition, the National Educational Finance Project plans to do research in manipulations:

- a. Personal income by pupil and by teacher between states (range, mean, from high to low).
- b. Personal income by pupil and by teacher within states by school district (range, mean, median and ranking from high to low).
- c. Comparison of total pupils with wealth as measured by number of low of high income returns, adjusted gross income and total income tax.
- d. Comparison of pupil/teacher ratio with wealth as measured by number of high income returns, adjusted gross income and total income.
- e. Comparison of pupil/number of returns ratio with adjusted gross income.

## APPENDIX E

page 447

### OTHER AVAILABLE DATA

al Finance Project has the following additional educational and personal  
public elementary and secondary school districts:

and teachers--Kindergarten

and teachers--Elementary

and teachers--Secondary

returns

exemptions

gross income

Educational Finance Project plans to do research involving the following data

y pupil and by teacher between states (range, mean, median and ranking

y pupil and by teacher within states by school district and by county  
ian and ranking from high to low).

al pupils with wealth as measured by number of low income returns, number  
turns, adjusted gross income and total income tax.

il/teacher ratio with wealth as measured by number of low income returns,  
come returns, adjusted gross income and total income tax.

oil/number of returns ratio with adjusted gross income and total income tax.
